## **UPDATE**

To the individuals we support and their families,

Throughout Ontario we have seen cautious and yet progressive reopening of services over the past month, as a result Bethesda is preparing to resume many of our services that previously have been modified or temporarily closed. The following is an update by program. Please bear in mind that we are making decisions in cooperation with the Niagara Public Health Department and the provincial government.

### **CHILDREN'S PROGRAMS**

We are targeting late August to early September as a date to reopen services to children and their families.

### **DAY ACTIVITIES**

We have begun the process of making the necessary changes to Day Activities with the anticipation of a late August to early September reopening.

### **ADULT CLINICAL SERVICES**

We are currently preparing to offer face-to-face services on a case-by-case basis, implementing a gradual resumption process.

### **ADMINISTRATION**

We will have our administrative staff begin to work out of our Schmon and Fly Road locations on a partial rotating basis, late August to early September.

All of the above is subject to change as we ensure the health and safety of everyone involved. In addition, as we work cooperatively with government changes may occur.

Thank you for your patience and understanding, if you have any questions, please let us know at [questions@bethedaservices.com](mailto:questions@bethedaservices.com).

Respectfully,

Brian Davies  
Chief Executive Officer  
Bethesda
