**UPDATE**

To the individuals we support, their families and our community partners,

To continue with our practice of providing transparent communication, I wanted to update you that a staff working within our residential programs in the Vineland area has tested positive for COVID-19. We are sending this staff member our best wishes for a speedy recovery. Since receiving notification from the staff member, we have been working diligently with Public Health and I am pleased to communicate that at this time this is the only confirmed case of COVID-19 we have. We are in the process of contacting all staff who have come into contact with this individual and will continue to work with Public Health to minimize the effects of this situation on others.

As always, if you have any questions please contact Bethesda in the manner you have in the past or contact [questions@bethesdaservices.com](mailto:questions@bethesdaservices.com) and we will make sure that someone responds to you as soon as possible.

Respectfully,

Brian Davies  
Chief Executive Officer  
Bethesda
